

Automatic Lockers

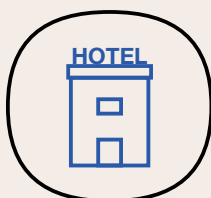

**Innovative
Solutions**

About Company

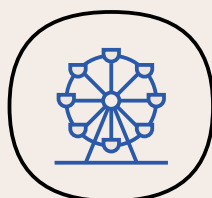

Violanta automatic lockers are always based on both advanced software and hardware solutions. Depending on the software logics, innovative lockers have performed various tasks for more than 10 years now.

Violanta has developed several custom software solutions for our clients in various fields. Based on the client's tasks, we offer a turnkey solution or adapt an existing one.

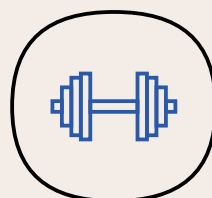

Lockers are indispensable:

in hotels and campsites

in
entertainment
parks

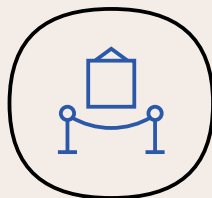

in sports clubs, water
parks

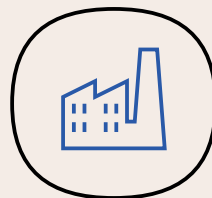

at railway
stations, in
airports

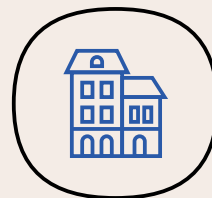

in SEC,
supermarkets

in exhibition
centers

at production
facilities, in
factories

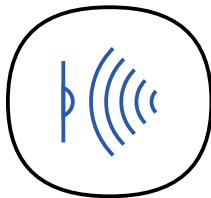

in residential
complexes, business
centers

ALs can also be used in other fields of activity.

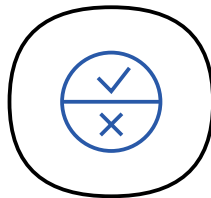

Our solutions are suitable for vending machines, post lockers, stations for charging gadgets, mail, post office, and deposit boxes, as well as any other electronic storage systems.

If you plan to develop the software independently, we can provide API, SDK, and Communication protocol for developers.

Ability to connect additional options:

infrared sensors in boxes
with a warning system

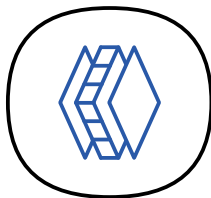

cell status diode:
used/free

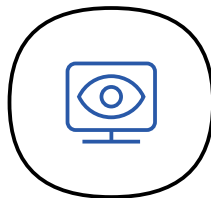

SMS
notifications

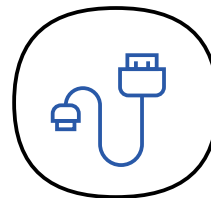

E-mail
notifications

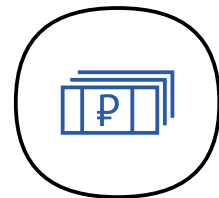

polycarbonate
windows

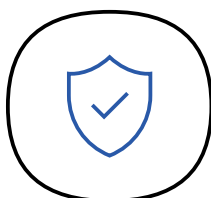

status
monitoring

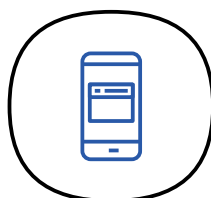

wires for charging
mobile devices

modules for receiving
cash or bank cards

integration
with an ACS

mobile app

Upon request, it is also possible to connect any other options.

About Company

Choose a turnkey solution or a custom-tailored solution to solve your problem.

We have installed lockers in more than 30 countries worldwide and in more than 100 cities in Russia and the CIS.

Manufacture of post lockers

- reducing parcel delivery and issuance costs
- various functions available
- design and equipment to meet your requirements
- we equip post lockers with a remote access system

Manufacture of mobile device charging stations

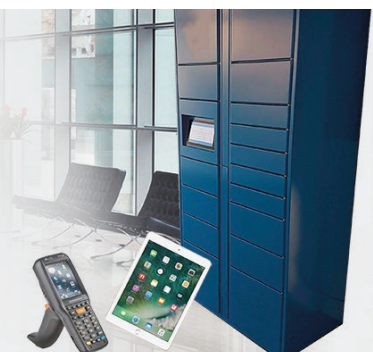

- access to boxes by pin code or barcode
- equipping with a payment terminal (optionally)
- sending operation reports by e-mail or SMS
- stations are equipped with a remote access system

Manufacture of electronic key storage facilities

- collecting information about who and when used the boxes
- generating and sending reports by e-mail
- access to boxes by pin code or RFID tag
- key locker remote monitoring and control

Automatic lockers to account for the use of devices

- to control the use of various devices and tools
- an RFID tag is applied to each device
- a specially designed software monitors who, when and for how long used the device and sends daily reports to your email

Automatic lockers for railway stations and airports

- we manufacture lockers with automatic access to boxes. Lockers can be equipped with a terminal for accepting bank cards or cash
- locker software, design, and dimensions are custom-tailored

Automatic lockers for changing rooms

- we manufacture lockers for changing rooms in sports centers or in factories
- lockers can be equipped with an automatic lock with RFID tag or pin access or a mechanical lock that opens with a key

Automatic bicycle storage lockers

- this type of locker is installed outdoors and designed to protect the user's bicycle from theft
- made of durable steel and equipped with an anti-vandal alarm

Electronic mailboxes for entrances and business centers

- automatically inform their users about delivery of new mails
- each box is equipped with a light indicator
- boxes are opened with the keys to the entrance or the pass to the business center

Production of food vending machines

- vending machines are designed for cafes and food outlets
- your clients will be able to order food in advance and pick it up in a vending machine without waiting
- the locker is equipped with software that will automatically notify the user of his or her order readiness

Automatic lockers for laundries

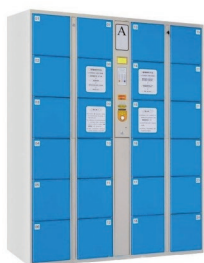

- using this type of locker greatly facilitates your laundry's operation
- in fact, it is an automatic reception and delivery point for clothes
- payment is made on site, when your client loads his or her clothes. Upon receiving washed clothes, a notification is sent to the client's phone

AL on the beach

Beach is not a place to worry.

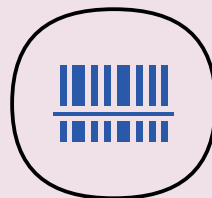

Install mobile lockers for vacationers to enjoy their rest rather than to worry about the safety of personal belongings.

We offer several types of access to boxes:

Pin code

It is created by the user or automatically. In the latter case, the pin code is displayed on the check or can be sent via SMS.

Water-resistant bracelets

A one-off bracelet is marked with a barcode or RFID tag which are read by the device mounted in the box.

Beach-mounted lockers not only look stylish, but are also resistant to the adverse weather effects and equipped with anti-vandal protection.

Your benefits:

- 24-box locker payback depends on traffic, but, on average, it takes up to 6 months
- Versatility: out of season, use the lockers in other crowded places
- Increasing loyalty to the company by ensuring the safety of personal belongings

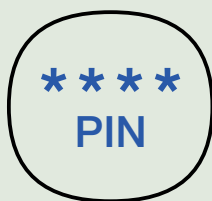

Production facilities, factories

Lockers for storing personal belongings of factory's employees increase the comfort level at the enterprise. The individual equipment of lockers makes it possible to take into account the production needs of your staff.

ALs are indispensable if you need to provide access control to production equipment. You can monitor the use of boxes and control the access thereto, set usage limits. If necessary, you can configure notifications.

We offer several types of access to boxes:

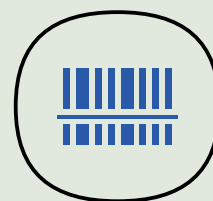

Pin code

It is created by the user or automatically and printed on the check or sent via SMS

Proximity cards

Em-marine, Mifare, HID plastic cards

Barcode key card

For production needs you can order:

- Electronic key storage facilities
- Electronic lockers for changing rooms
- Automatic lockers for clothes and food dispensing machines

Violanta lockers can be connected to the company's ACS (access control system) and provide control over the use of boxes.

The administrator has access to the report about persons who used the boxes and the usage time, as well as the administration mode.

Your benefits:

- Shared inventory access control
- Increasing loyalty to the company by ensuring the safety of personal belongings

Supermarkets

Automated lockers in shopping and entertainment malls, supermarkets, and entertainment centers provide a high level of security and indicate the high status of the retail network.

Access to lockers is provided by a check with an individual barcode. On request, lockers can be equipped with a bill or coin acceptor to pay for storage services.

Your benefits:

Keys will not be lost and you will save on multiple key replacement. Our lockers feature a welded design that provides the system's sufficient strength and reliability. Users are more loyal to such a locker.

- Safety of client's personal belongings
- No need to make new keys if they are lost

Swimming pools

With ALs, personal belongings of visitors to swimming pools, water parks, baths and saunas, spa salons are securely protected. Access to boxes is provided via a moisture-proof bracelet that is comfortable for customers, with RFID tags or barcode.

The bracelet is securely attached to the wrist, without interfering with water activities, and the risks that it will lose are minimized.

Your benefits:

AL returns are extremely high, as visitors rarely spend more than 2 hours in a pool or water park. During a working day, one locker is used 5 to 6 times.

You can organize paid access for using lockers by debiting the money for storage from RFID tags.

Increasing loyalty to the company by ensuring the safety of personal belongings.

Material:
HPL plastic

Material: metal

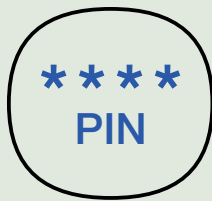

Electronic mailboxes

Postal services are relevant despite the global digitalization.

In order for apartment owners in your residential complex to be confident in the safety of their letters and receipts, it is recommended to install electronic mailboxes.

This will increase the comfort level of in your establishment.

We offer several types of access
to boxes:

by pin code

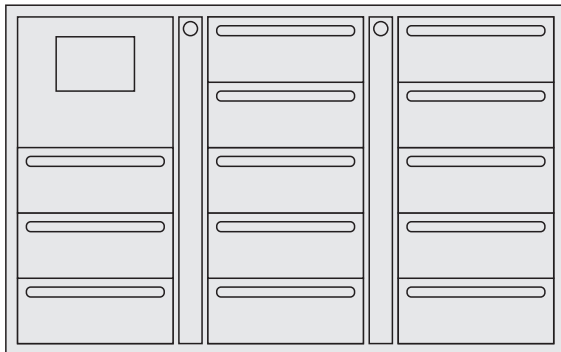

by card or pendant
with an RFID tag

Additional functions

The system can be equipped with a 7-inch display and sensors and light indicators that indicate the availability of new letters. It is possible to install mailboxes that connect modularly: 18 boxes + 10 boxes + 15 boxes up to 200 pcs - to one control module. Custom solutions are also available.

ELECTRONIC MAILBOX 13D

Metal welded design

Number of boxes - 13

7-inch stock-resistant display

Industrial computer Celeron 1037 U

14 electronic locks

Proximity card/tag reader: Matrix-III RD-ALL

Box slot size: 16×264 mm

Dimensions □ 820x1220x300 mm

13 boxes

box dimensions: 140x340x300 mm

Your benefits:

Modern and reliable mailboxes increase the potential buyers' interest to your residential complex, whereas replacing old mailboxes with new ones increases the residents' trust in the managing company.

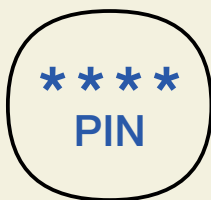

Charging phones and tablets

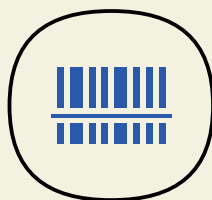

The problem of charging a mobile phone or tablet in public places is as relevant as ever.

CHARGE LOCKER SERIES automatic lockers with integrated connectors for the most popular phone models will solve this problem.

We offer several types of access to boxes:

by pin code

by check with
barcode

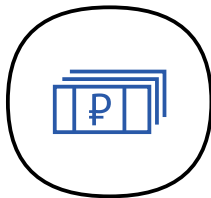

by code
received in an SMS

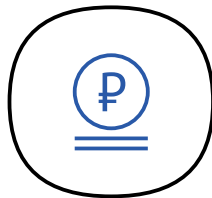

by proximity
cards

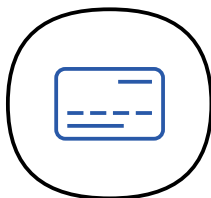

Lockers can be equipped with:

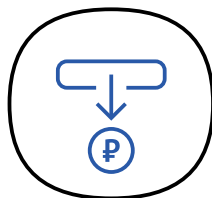

bill acceptor

coin acceptor

bank card payment
module

change dispenser

Your benefits:

CHARGE LOCKER SERIES

automatic lockers will help you provide a high comfort level for visitors, increase their loyalty.

It is also an additional source of income.

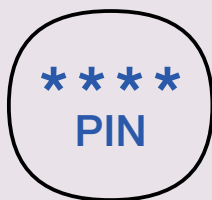

Railway stations Airports

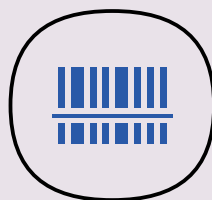

New generation modular STATION-LOCKER ALs are adapted for large transport hubs.

They feature an anti-vandal protection and an additional security system: if necessary, you can connect video surveillance, alarm system.

We offer several types of access to charge lockers:

by pin code

by check with
barcode

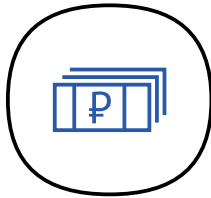

by card with a
RFID tag

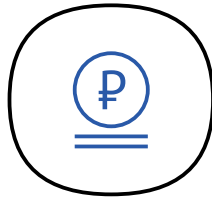

by
fingerprint

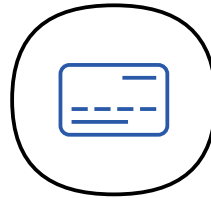

Lockers can be equipped with:

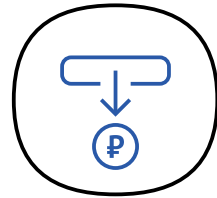

bill acceptor

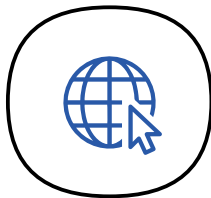

coin acceptor

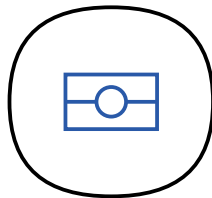

bank card payment
module

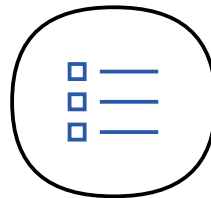

change dispenser

paid Internet
access

passport
scanner

other options on request

Your benefits:

Locker will bring you additional income.

Electronic lockers enjoy greater trust with customers than those with keys, and the remote monitoring and control system guarantees complete safety of items.

Various reports, statistics, monitoring.

Post lockers

It is almost impossible to plan targeted delivery of goods at a specific time. In order not to waste time waiting for a courier, customers can use post lockers. This is a self-service terminal with boxes for storing parcels and an automated unit for issuing orders.

Benefits of post lockers:

- safe storage
- convenient and simple 24/7 service
- custom-tailored software
- easy integration
- savings for courier companies
- picking up a parcel takes only a few minutes
- order return option available
- option to accept payment for goods available

Your benefits:

Logistics cost optimization.

Service for receiving parcels through post lockers is rapidly gaining momentum. The e-commerce market is growing at an average rate of 30% annually and using post lockers you can optimize last mile costs. The user can receive the package at any convenient time. Post lockers are usually installed in crowded places.

Vending machines

Vending machines are good facilities for individual sales of small items.

However, the Violanta company offers a solution for selling goods of various sizes at the customer's request.

Your benefits:

In Europe and the USA, vending lockers are very popular as they allow for selling a wide range of goods: sport equipment, items for fishing, packaged farm products, gas cylinders, pharmacy drugs. The higher the comfort level for customers when buying goods, the higher the chance that the purchase will be made with you.

Custom-tailored lockers

If standard ALs do not meet your needs for any parameters, we will manufacture any model in terms of design and functionality

- Material: metal, ABS plastic, wood, chipboard, MDF panels, transparent polycarbonate door.
- Types of lock: mechanical or electronic, by pin code, bracelets, and pendants.
- External design: locker color, box size, system dimensions: any on request.
- Additional modules: light, ventilation, electronic devices, etc.

Warranty of 12 months or more for all products.

Order automatic lockers at Violanta right now!
Our managers will select for you a solution that will meet your needs. We know everything about personal belongings safety!
